

Tree Trimming Service

Having problems with flickering or dimming lights? Tree limbs rubbing or laying against your electric service line might be the culprit. OMLPS offers free tree trimming to remove branches that come in contact with electric services. Tree trimming shall be limited to pruner pole trimming only.

Removal and disposal of brush is the responsibility of the property owner. If pruning tree will not eliminate constant contact with electric service, OMLPS recommends the use of tree guard and will install free of charge. Where the tree will likely cause damage to the service line and the problem cannot be remedied by pruning or the use of tree guard, the customer shall be notified of the problem.

If customer's service requires extensive trimming not provided by OMLPS, OMLPS will drop the overhead service line at no charge to the customer to allow for trimming or removal of the tree.

For more information on OMLPS's tree trimming policy, please call 775-7260.
